**ALDEAVISION ANNOUNCES EXPANSION OF ITS
GLOBAL BROADCAST SERVICES TO MONTERREY MEXICO**

AldeaVision opens new fiber video point-of-presence in Monterrey, Mexico

Monterrey (Mexico) March 30th, 2009 – **AldeaVision Solutions Inc.**, an innovative provider of international video broadcast transmission services, announced today the expansion of its global video fiber network in Monterrey, Mexico. This new video point-of-presence complements the existing AldeaVision coverage in Mexico, which already includes nodes in Mexico City and Guadalajara, and brings the Company’s international video foot print to 18 cities in 10 countries.

AldeaVision, a subsidiary of Marcatel, is a regular provider of international transmissions in High Definition (HDTV) and Standard Definition (SDTV) to television networks throughout the Americas and Europe covering political, entertainment and sporting events such as the Olympic Games at Beijing in 2008 and the 2008 US Presidential elections.

“The opening of this new facility in Monterrey is in direct response to requests from our customers for additional service coverage in Mexico. Now the local and regional television stations in the three major cities of Mexico can interconnect to the seamless AldeaVision automated video transmission platform and transport their content within Mexico or internationally in a simple, reliable and secure way” said Lionel Bentolila, CEO of AldeaVision.

The new video node, located at Marcatel’s headquarters in the heart of downtown Monterrey, is easily accessible via external video access positions that allow customers to send video material or do “live” reportage. Customers can transmit to any one of the thousands of connection points on the AldeaVision Global Video Network. These facilities can be reserved via the web and activation is totally automated and controlled via AldeaVision’s systems.

“Opening this node here in Monterrey where Marcatel’s headquarters are located is just the first in a series of new network facilities planned for AldeaVision throughout the Mexican market and throughout the Americas” said Robert K. Lacy, CEO of Marcatel.

ALDEAVISION ANNOUNCES EXPANSION OF ITS GLOBAL BROADCAST SERVICES TO MONTERREY MEXICO

Page 2

“Monterrey is one of the most important cultural cities in Latin America, home to some of the most prestigious educational, technical and medical institutions, therefore it was very important to include Monterrey on our intercontinental fiber optic network with the newest state-of-the-art technology node to connect all the cultural, sports, political and news events and to send them around the world in milliseconds”, added Gustavo M. de la Garza Ortega, Chairman of Marcatel and its subsidiaries.

AldeaVision services in Mexico are fully operational and the new node in Monterrey was commercially launched at Marcatel on March 30th, 2009.
