

Broadcast Deployment Technician/Engineer

Aldea Solutions Inc. - Montreal, QC CANADA

Aldea Solutions, Inc. is a leading provider of services and solutions for the television and media industries. Established in 2000 in Montreal, Canada, Aldea offers fully managed transmission services using its fibre and partner teleport facilities. Services include full time and occasional use services, video streaming, and production and transmission services. The Company's services are used by leading major broadcasters and media companies around the world for the transmission of sports, news and television programming.

The Broadcast Deployment Technician / Engineer is a member of the Deployment & Maintenance Group and Network Engineering department, responsible for the implementation of customer solution and network maintenance on the Aldea Video Network. His/her main responsibilities include:

- Act as the Project Leader for the implementation of new equipment, customer specific solutions and new services.
- Define operational procedures for the Network Management Center (NMC) and training of NMC personnel.
- Work closely with sales representatives in the preparation of proposals and offers, particularly in relation to technical solutions and configurations.
- Assist network operation staff in trouble shooting the network for complex problems, and provide the specific information to help Operators to interface with customers' technical staff and engineers.
- Work closely with other Aldea departments to ensure they are aware of the customer's technical perspective in an Aldea proposed solution,
- Install provision and configure equipment and devices at customer site and POP locations.
- Document and update new and existing implementations, including diagrams, device configurations, rack layouts, etc.

Desired Skills & Experience

- Bachelor in Engineering (Telecommunications) or equivalent experience related to video broadcast services.
- Fluency in Spanish is required, very good English, oral and written. Conversational French.
