ALDEA

Web Applications Developer

Reporting to the Director, IT and R&D, the Web Applications Developer is responsible for developing innovative web-based applications that are central/key to the success of our broadcasting and telecommunications operations.

Responsibilities:
- Develop detailed specification documents with clear project deliverables and timelines, and to ensure timely completion of deliverables;
- Design and develop web applications that are highly interactive and graphical. This involves being part of the entire software development life cycle (SDLC). Majority of the development is front-end;
- Support, fix, maintain, and improve existing software/functionalities;
- Develop new applications for new projects;
- Design and perform system testing and validation procedures;
- Create the appropriate documentation for software, systems, and processes.

Requirements:
- Bachelor's degree in Computer Science or relevant field;
- Minimum 10 years' experience in software development. Candidate MUST have worked on the entire software development life cycle (SDLC);
- Experience working on a variety of software development projects;
- MUST be fluent in English, both oral and written as there will be lots of interactions and meetings with the Montréal office (in Canada);
- Autonomous, self-managed with the ability to work remotely with minimal supervision as the Director is based out of Montréal, Canada;
- Fast learner, able to grasp new concepts quickly;
- Interest in working in a fast-paced environment and under pressure;
- Great team player that likes to work with teammates/co-workers abroad.

Good proficiency with the following technologies is a MUST:
- Node.js
- Nuxt.js
- Linux, bash
- Vue.js
- REST/RESTful
- MongoDB

Good knowledge of the following technologies as well:
- JavaScript
- HTML, CSS, SASS
- OpenAPI, Express
- Docker (Kubernetes or Swarm)

The candidate is required but not limited to build PWA applications using Nuxt Framework, with SSR and full SEO.
